STUDIO ARTWORKS

liquidoranges STUDIO art represents the core of everything we do. ALL of our design work begins here, as artwork created exclusively on the computer and printed using the giclée process. This is the finest ink on acid free museum paper process available, and is comparable to the stone lithograph process. The results offer absolutely stunning clarity, resolution, detail, color and depth. Our experience in working with giclée printing supports our commitment to "true representation" of our works as we see them on our high-resolution monitors.

liquidoranges STUDIO designs, develops and produces a variety of products for Architects, Interior Designers, and Retail Customers based on our STUDIO artworks. Our products are represented through strategic partnerships with our manufacturers and through liquidoranges STUDIO agents around the world. We develop our own exclusive brands, as well as products for international companies to enhance their product lines.
